## Internal Recycling Range

## Stexisin 90

The Steribin was designed for the NHS and is now part of the furniture in universities, colleges and businesses. This is Leafields' first pedal recycling bin, there is a wide but shallow foot print which is ideally suited to environments where space is limited and as an optional extra the SteriBin can be offered with an antimicrobial additive.

- Lid closes into tight recess to help contain odours
- Mould-in graphic labels - no sticky edges where bacteria can build up
- Front moulded handle - for ease of manoeuvre and to reduce manual handling
- Option of either a single or triple (30/30/30) waste stream

Front non-marking wheels - for easy manoeuvre.

- Double skin wall of the product is kept in tact even after component assembly providing easy to clean surfaces
- Includes either sack retention bar or plastic liner
- Complete component strip down - in under eight minutes for deep clean

Tilting sack frame, one movement for very quick and safe bin maintenance.

VITRI STRTHSTICS
